Based on your profile, the recommended training route is: **integrated**

Your recommended training route has been selected based on your budget, timeline, and career goal. Speak to matched schools for a detailed programme breakdown.

Estimated Cost & Timeline

Estimated Total Cost

£45,000–£100,000 (varies by route and country)

Estimated Timeline

18 months – 4 years

Key Risks & Your Biggest Barrier

Based on your assessment, your biggest barrier is: cost. This is a common challenge for aspiring pilots at your stage. The next actions section below provides specific steps to address this.

Your Next 5 Actions

- 1 Book a Class 1 Aviation Medical with a CAA-approved AME to confirm your medical fitness before committing to training costs.
- 2 Research integrated programmes in UK — request prospectuses from the matched schools in your AviatorIQ report.
- 3 Arrange a training finance consultation if required — many schools offer payment plans and specialist aviation lenders exist.
- 4 Join an online pilot community (PPRuNe, Reddit r/flying) to connect with students currently in training on your chosen route.
- 5 Return to AviatorIQ to request introductions to your matched schools — they have been selected based on your specific profile.

Ready to speak with a flight school?

Return to your AviatorIQ results page to request introductions to your matched schools. They will receive your full profile and contact you directly.
